SUMMARY

Motivated professional with 13+ years of leadership and operational experience in the U.S. Air Force, seeking to transition into a Software Developer role. Skilled in problem-solving, team collaboration, and quick adaptation, focusing on delivering high-quality results in fast-paced environments.

SKILLS

- Exceptional problem-solving and critical thinking abilities.
- Knowledge of software testing protocols (unit tests, integration tests).
- Adaptable to dynamic environments and efficient in multitasking under pressure.
- Familiarity with Agile methodologies and SDLC (Software Development Life Cycle).
- Ability to debug, troubleshoot, and design solutions to technical issues.
- Strong communication and collaboration skills in cross-functional teams.

PROFESSIONAL EXPERIENCE

LEADERSHIP

SEPTEMBER 2011 – DECEMBER 2024

- Led a 4-person team in major training operations, ensuring successful planning and risk mitigation for over \$1.5 billion in assets. This experience developed my ability to foresee and address issues pre-emptively, like identifying and resolving software defects.

INNOVATION

- Innovated during a critical operation, working without communication systems, resulting in a successful mission. This showcases my ability to work under pressure and adapt quickly to key traits for software testing in dynamic environments.

ADAPTABILITY

- Adapted team processes and maintained performance after unexpected personnel loss, ensuring no delays in mission support, reflecting my experience in handling fast-paced environments and continuous change

EDUCATION

Bachelor of Science in Engineering, Embry Riddle Aeronautical University, in progress – 74 credit hours completed
